## PROFESSIONAL EXPERIENCE

**Part-time Instructor** | **Epicodus Code School** | Portland, OR

Feb 2020 - Current

- Help guide students through both the Intro to Coding and JavaScript/React tracks at part-time in-person classes.
- Perform code reviews for student projects.

**Volunteer Front-End Developer** | **Code For PDX** | Portland, OR

Jan 2020 - Current

- Working with a small team of developers to build an app for a non-profit that is helping people transition out of homelessness.
- Translating wire frames into reusable React Components.

**Full-Stack Developer Intern** | **CD Baby, Inc.** | Portland, OR

Aug 2019 - Sept 2019

- Designed and built an internal company tool using React/Hooks/Typescript front-end and a C#/EF Core/SQLiteBackend.
- Created a C# independent API backend that made requests to partner API endpoints and saved data to a SQLite database.
- Creatively wireframed and programmed a React front-end that made calls to the back-end API to retrieve and model database data using thoughtful UI.
- Collaborated with developers to strategically develop internship project, problem solve & learn best practices.
- Actively participated in agile/scrum planning with project managers, designers and data teams.

**Owner/Designer/Printer** | **STENCILITIS Screen Printing** | Portland, OR

2013 - Current

- Successfully built and ran a small screen printing business that has been profitable all years of operation.
- Actively acquired & retained clients, resulting in a regular client base of 40+ customers.
- Collaborated with clients to design logos, apparel and other image layouts.
- Devised marketing plan for business, website design with website builder, HTML, CSS.
- Executed continuous research on new print techniques & products to problem solve ever changing customer needs & to provide up to date printing technologies.
